## LONG LASTING PROTECTION

Woco Barn Paint provides excellent protection and improved appearance to a huge variety of applications, for farms, businesses, homes and gardens.

This remarkable low-toxic, water based paint can be applied straight onto previously prepared surfaces.

Made from a unique acrylic resin system our Barn Paint offers a tough, durable, microporous protective coating, with excellent colour retention.

Flexible with the substrate, it reduces flaking and blistering, providing a long lasting attractive coverage.

Available in a range of thirteen coastal inspired colour ways this exciting range is specially formulated to improve the appearance of many outdoor structures.

FARM BUILDINGS

SHEDS & GARDEN FURNITURE

## BARN PAINT APPLICATION

Woco Barn Paint is supplied at the right viscosity to apply by brush, roller or spray.

Preparation is key. This product can be applied to most previously painted surfaces, such as weathered bitumen, tar, varnish or creosote, but we recommend the surface is clean, dry and free from contaminants before the application process begins.

This product does not require a primer and is touch dry usually within two hours. After four hours, the product should be able to be re-coated with another layer of Woco Barn Paint if required. For plastics please try a small area first to ensure successful adhesion. Please note unweathered galvanised surfaces may need pre-treating first.

# FREQUENTLY ASKED QUESTIONS

## WHAT IS WOCO BARN PAINT MADE FROM?

Woco Barn Paint is manufactured using a unique blend of water based acrylic resins with high quality organic pigments to colour.

## IS IT NON-TOXIC AND SAFE FOR USE?

Once dry Woco Barn Paint is no more harmful than standard water-based emulsion paint.

## HOW DO YOU APPLY BARN PAINT?

You can brush, roller or spray Woco Barn paint.

## WHAT IS THE COVERAGE OF WOCO BARN PAINT?

Woco Barn Paint will cover approx. 8 -10 sq. metres per litre. The variance is dependent on application, and of course the substrate you are painting.

## WHAT IS THE OPACITY OF WOCO BARN PAINT?

Woco Barn Paint has very good opacity and colour retention. One or two coats would be recommended depending on the substrate to be painted, please consult our technical department for advice on preparation and application.

## IS WOCO BARN PAINT SUITABLE TO USE ON THE INTERNAL WALLS OF WOODEN STABLES?

Woco Barn Paint is a water-based acrylic, non-toxic paint and therefore once dry is perfectly suitable for use around animals.

## IS WOCO BARN PAINT SUITABLE TO USE ON METAL OR CORRUGATED IRON?

It can be applied to suitably prepared metal but does not have any anti-corrosive additives within the formulation so we would recommend using our water-based Zinc phosphate primer as a first coat (TDS 576).

## CAN IT BE USED ON GARDEN DECKING?

Yes, Woco Barn Paint can be used on garden decking.

## CAN I PAINT OVER A PRE-PAINTED SHED / FENCE / PERGOLA ETC.?

Yes, you can paint directly over an existing painted surface. We recommend the surface is cleaned well and / or rubbed down lightly with sandpaper before applying.

## CAN WOCO BARN PAINT BE APPLIED OVER TRADITIONAL CREOSOTE / CREOCOTE / WOOD PRESERVATIVES?

Yes, if the Creosote / Creocote / Wood Preservative is sufficiently weathered and has lost its oily appearance. We would not recommend WOCO Barn Paint to be applied over freshly applied creosote / creocote / wood preservatives due to bleeding. We also recommend an application of blocking primer if used on resinous timber.

## WILL WOCO BARN PAINT COVER PVC PANELS?

Yes, Woco Barn Paint will cover PVC in one / two coats.

## CAN I USE BARN PAINT ON MASONRY / BRICKWORK?

Yes, you can use Woco Barn Paint on masonry and brickwork.

## WHERE CAN I BUY BARN PAINT?

You can order online or telephone your local depot or visit one of our stockists throughout the UK.
