PROLAN

The Natural High Performance Lubricant

Environmentally Sensitive & Award Winning

The Natural High Performance Lubricant

In recent years there has been a global move towards more environmentally sustainable products and people are increasingly looking for more environmental alternative lubricants and greases. Prolan lubricants are truly remarkable products for use in the fight against corrosion and protection...

Witham Group have previously been a distributor of Prolan products, but are now proud to be the sole importer and distributor for the UK and Ireland. The Prolan concept was originally created in New Zealand and is now a growing global, environmentally friendly, and extremely high quality lubricant range that Witham are delighted to be involved with.

The choice of products has been expanded by Witham to create five new viscosities, from light grade to extreme grade. Prices have also been drastically reduced, due to the reorganisation of the import structure. As more companies address the use of chemicals in their supply chain, and want to improve their sustainability credentials, this unbeatable high quality lubricant is a popular choice for many businesses.

### THE BENEFITS OF LANOLIN BASED LUBRICANTS

Prolan products are made with lanolin derived from sheep's wool. Lanolin is a powerful natural product often known as 'wool grease' and has been used for centuries as a natural moisturiser and protector. Raw lanolin is a natural substance secreted by sheep to provide a protective coating on their fleece for protection in harsh conditions. Once the sheep have been shorn, the fleece undergoes a scouring and refining process to extract the lanolin and to clean the fleece.

Lanolin's strong lubricating and protective qualities have been used to outstanding effect in many industries, particularly on metal surfaces and moving parts, by forming a long lasting natural barrier that protects and prevents corrosion. Its unique formula enables the lubricants to stay in place and not evaporate. They are not washed off or displaced by salt water spray, which sets them apart from traditional petroleum based lubricants.

### ENVIRONMENTALLY FRIENDLY & SAFE TO USE

Our planet is under threat from the long term use of chemicals. Many customers require a high quality lubricant but now wish to have a more environmentally safe product on their machinery to protect their staff and the environment in which they work. Lubricants and other chemicals can affect areas such as agricultural fields, waterways and forests. Prolan products are non-toxic, non-carcinogenic and biodegradable – making them safe for the environment and good for health and well-being.

### NON-TOXIC, FOOD & WATER SAFE

Prolan lubricants have gained a number of International Food Safety Approvals and in the UK are NSF approved for both H1 and H2 requirements. This means they are certified as approved 'food-grade lubricants'.

The range is especially suitable for sensitive environments such as forests, waterways, food manufacturing, horticultural, agricultural and marine locations as well as a long lasting easy to use general lubricant for around the workshop or home. Prolan is an excellent wood preserver as it has added linseed which protects the wood from moisture, rot and greening. It is a safe alternative to Creosote. Using the correct lubricant in these sensitive situations is clearly crucial.

### OUTSTANDING PERFORMANCE IN THE FIGHT AGAINST RUST

Powered by New Zealand based lanolin experts, this product range has been formulated by qualified engineers and lubricant specialists who understand the corrosion problems encountered by many industries. The key fact is that the environmentally friendly elements of this lubricant range do not compromise their performance.

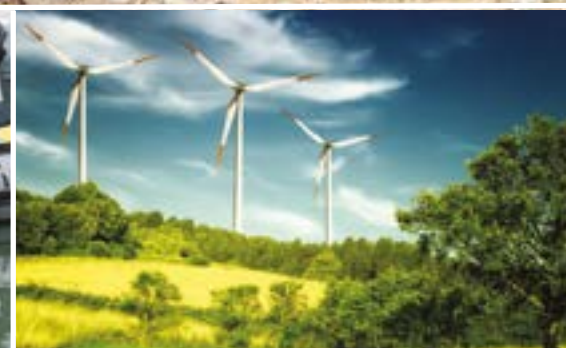

This range of products can be used in absolutely any industry and has won many awards for its many innovative environmental applications.

### EXTENDS THE LIFE OF EQUIPMENT & MACHINERY

*"We have been very impressed with Prolan and apply it to our farm machinery to prevent corrosion and extend its useable life. It is so versatile and cost effective - I would recommend Prolan to everyone."*

Ben Bowerman - Godlingston Manor Farm, Dorset

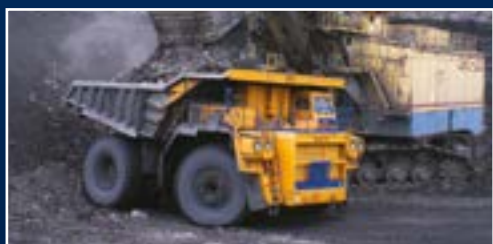

# IDEAL FOR A WHOLE RANGE OF INDUSTRIES & USES

## AGRICULTURE

Great for preserving, lubricating and protecting all agricultural equipment such as tractors, ploughs, sprayers, fertiliser spreaders, 4WD's. Protects against fertiliser corrosion and manure. Ideal for a whole variety of uses on the farm.

## PLANT & OFF ROAD

Prolan has a unique formula which allows the high capillary action to penetrate into moving parts and double chassis skins that are especially vulnerable to corrosion, forming a thick and durable anti-corrosive layer. Ideal for vehicle and machinery chassis and wiring systems. It allows its natural water-repelling properties to help protect vehicles from water, mud and corrosive chemicals.

## MARINE

Prolan is excellent on boats, trailers, inside boat motors (eliminates deterioration of rubber and wiring components), fishing gear and any aluminium or stainless steel fittings. Stays on in harsh sand and salt environments. Easily gets salted and rusted parts moving. Keeps waterways and marinas environmentally safe.

## WOOD PROTECTION

Prolan is predominantly made of lanolin with some added linseed oil which makes it an excellent wood preserver as the linseed oil soaks in, drawing the lanolin with it. The lanolin protects the wood from moisture and prevents rot. It also acts as an anti-bacterial barrier preventing greening and moss. It's a safe alternative to Creosote, and other wood preservatives, having no impact on flora, fauna, animals or children.

## COMMERCIAL VEHICLES

Prolan stops rust forming even in places you can't reach. Spray Prolan lubricant on truck chassis and wiring systems, and allow its natural water-repelling properties to help protect vehicles from water, mud and corrosive chemicals. Truly amazing corrosion inhibitor Prolan will help increase machinery life and resale value.

## CLASSIC & VINTAGE

Prolan can be used on vehicle chassis, panel work, frames, pins and bushes. It is ideal for rust prevention and lubrication of older vehicles keeping them in tip top shape for many years.

## WORKSHOPS

Prolan is an unbeatable, all round, general workshop lubricant. For use on nuts, bolts, chains, threads, rubber seals, welding, drilling, cutting, hinges, handles, springs and coils. One aerosol can of Prolan lubricant replaces a multitude of other workshop lubricants.

## HOME USE

Save money around the home with one multi-use can of Prolan. Ideal for sporting equipment, bicycles, caravans, guns, window frames, locks, doors, hinges, lawnmowers and gardening tools.

## HORTICULTURE

Ideal for lawnmowers, forestry equipment, gardening tools, and a whole range of horticultural machinery, Prolan will save you valuable time and money by reducing maintenance and the cost of replacing equipment, as well as being kind to the environment around you.

## AUTOMOTIVE & PCMO

Prolan's powerful lubricating and rust protective qualities are ideal for the car industry. Prolan can be used on vehicle chassis, panel work, frames, pins, bushes and many other moving parts to great effect preventing moisture penetration.

## ELECTRICAL

Prolan products are non-conductive and therefore will completely prevent electrolysis, stopping seizing, rust or corrosion and is able to be used on all electrics. It protects earth wires from corroding and therefore protects circuitry. Ideal for circuit boards, battery terminals, connections and electrical wiring.

## INDUSTRY

Prolan extends the longevity of a huge range of equipment and machinery and is ideal for a whole variety of industry uses. From construction, cranes, barges, harbour equipment, diggers, loaders, wind turbines to factories, production lines, quarry equipment and much more. This food safe and biodegradable lubricant offers unbeatable protection.

**PROLAN**

Helping you and your business become more sustainable

## AVAILABLE IN 5 STRENGTHS AND VISCOSITIES

All viscosities are non-carcinogenic, non-toxic, biodegradable, environmentally friendly and internationally certified by NSF for worldwide certification in food processing industries.

NEW

### PROLAN LIGHT

- Non carcinogenic, non toxic, biodegradable
- Environmentally friendly
- Excellent resistance to mineral acids and alkalis
- Safe to use on electrical equipment
- Long lasting
- The lower lanolin content ensures a thin, even coating potentially eliminating the need to remove the coating when product is reused
- Protects against corrosion
- Lighter coating than other Prolan grades
- Easy to apply
- Safe and clean to use.

PRODUCT SIZE  
1, 5 AND 25 LITRES

### PROLAN MEDIUM

- Multi-purpose general workshop lubricant for rust protection
- Excellent wood preserving properties, protecting from moisture, rot, greening & moss
- Resists acids and alkalis
- Frees up frozen components
- Lubricant for drilling, cutting, machining and pressing
- Electrical wiring and connections, non-conductive up to 70KV, won't break down rubber or wiring
- Environmentally friendly and biodegradable.

PRODUCT SIZE  
400ML, 1, 5 AND 25 LITRES

### PROLAN HEAVY

- Long lasting rust protection for vehicles and machinery; saves time on re-application
- Stays on in harsh conditions (sand, salt, mud, fertiliser etc.)
- Helps increase machinery life and may increase resale value
- Ideal for heavy machinery applications fertiliser, spreaders/loaders
- Environmentally friendly and biodegradable
- Internationally certified by NSF for worldwide certification in food processing industries.

PRODUCT SIZE  
400ML, 1, 5 AND 25 LITRES

NEW

### PROLAN EXTREME

- Long term rust protection, leaves clean dry waxy coating
- Use in extremely corrosive environments
- Stays on in harsh conditions (marine, sand, salt, mud, fertiliser etc)
- Ideal for heavy construction, plant and off road machinery
- Ideal for all marine environments
- Long term rust protection for equipment stored outside
- Ideal for all horticultural and agricultural vehicles, machinery and spray equipment
- Natural long lasting protection saving time on multiple re-application
- Resists acids and alkalis, moisture & salt
- Environmentally friendly and biodegradable.

PRODUCT SIZE  
1, 5 AND 25 LITRES

### PROLAN ANTI-SEIZE

- An incredibly long lasting grease that saves time and money on multiple re-applications
- Able to last up to 30 years
- Protects metal, rubber and battery terminals from corrosion caused by water, moisture, acid and salt
- Extremely good anti-seize prevention for stainless steel threads
- Lifts rust scale, cleans metal and frees up seized parts
- Can be used in and around electrical connections to prevent moisture penetration and corrosion
- Environmentally friendly and biodegradable
- Internationally certified by NSF for worldwide certification in food processing industries.

PRODUCT SIZE  
100ML, 500ML AND 4 LITRES

NEW

### PROLAN SPECIFIC DEGREASER

- A citrus based cleaner & degreaser, formulated using citrus solvents for maximum cleaning power
- Designed especially to remove unwanted greasy areas left behind from the Prolan range
- Leaves surfaces thoroughly clean
- Ideal for use on most surfaces including stainless steel, machinery equipment, vehicles, work surfaces, vinyl, paint and wood
- Can be diluted with either fresh or salt water, making it ideal for use in marine environments
- Easy to apply.

PRODUCT SIZE  
5 AND 25 LITRES

## APPLICATION

Prolan lubricants are easy and safe to apply by either using an aerosol, trigger pack sprayer, paint brush or simply wiping onto surfaces as required by the type of viscosity.

**The Natural High Performance Lubricant**

#### **WE'RE HERE TO HELP...**

Prolan is available to order online or from any of our trade depots. We also have a whole range of other environmentally sensitive lubricants. Please contact us if you require further information, advice, or to become a stockist.
